

Patient Name: Sarah Thompson

Age: 58

Date: 17/03/2024

Referring Physician: Dr. Patel

Department: Cardiology

Chief Complaint:

The patient presents with chest pain radiating to the left arm, shortness of breath, and fatigue during minimal exertion.

Examination Findings:

ECG shows ST-segment depression in leads V4-V6.

Echocardiogram indicates left ventricular hypertrophy with preserved ejection fraction.

Diagnosis:

- Stable Angina
- Hypertension
- Hyperlipidemia

Medications Prescribed:

- Amlodipine 5mg OD
- Atorvastatin 20mg OD
- Nitroglycerin SL PRN

Recommendations:

- Schedule a stress test within one week.
- Follow-up visit in 10 days.

- Lifestyle modification including low-sodium diet and regular exercise.
